

Logging in to ADP Mobile

If you've already registered at <https://myaccess.adp.com> then simply use the same credentials within the ADP Mobile app

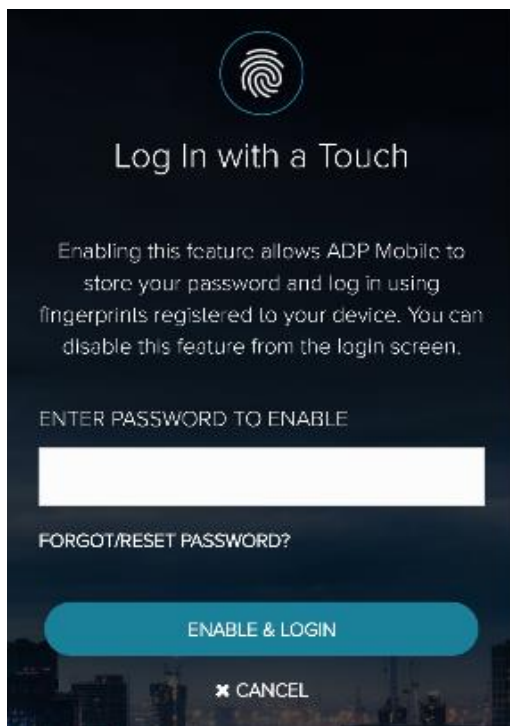

Enable Fingerprint

You can enable fingerprint login by tapping the Enable Fingerprint icon on the password screen

Then enter your password and hit Enable and Login

The next time you log in you will be able to use your devices built in fingerprint reader instead of entering your password.

Registering on Mobile

If you haven't registered on <https://myaccess.adp.com> you can do so on the ADP Mobile App by going to New? Get Started at the bottom of the screen

The application will go through a series of steps to attempt to register you:

1. Enter a code if you received one via email
2. If you did not receive a code, a number of identification questions will be asked

If you're having trouble registering, please reach out to your payroll administrator.
